

Communism is a movement to create a classless, moneyless, stateless social order structured upon common ownership of the means of production, as well as a social, political and economic ideology that aims at the establishment of this social order.

Socialism consists of an organization of production to directly satisfy economic demands and human needs, so that goods and services would be produced directly for use instead of for private profit driven by the accumulation of capital.

Capitalism is an economic system that includes private ownership of the means of production, creation of goods or services for profit or income, the accumulation of capital, competitive markets, voluntary exchange, and wage labor.
